

VISION & CORE VALUES

Aralia is an open data ecosystem capable of connecting unbounded autonomous, AI-ready Data Planets from diverse domains — advancing decentralized and equitable data sharing, and ushering in a new era of a fair, just, and highly civilized data economy.

SAFEGUARDING DATA OWNERSHIP

AI AGENT DATA SERVICES

PRODUCT FEATURE HIGHLIGHTS

Abundant • Real-Time • Ready To Use

No heavy processing. Just effortless data access and immediate value — right from the get-go.

DATA PROVIDER

I HAVE DATA →

I know the quality, I can publish it, control permissions & set sharing rules.

DATA EXPLORER

I WANT TO USE DATA →

I can find it fast without downloading & gain insights across domains.

AGENT DEVELOPER

I BUILD AI →

I don't need to prepare data — I can access a wide variety of data sources via APIs.

VISUAL EXPLORATION & ANALYSIS

Explore and interpret data visually using the Unfold-Observe-Examine-Filter™ method — making data truly accessible.

DATA PROFILING

Get instant statistical overviews to understand data quality and structure.

GEOSPATIAL DATA EXPLORATION

Use interactive maps to analyze spatial data across one or more Data Planets.

TRANSPLORE™

Analyze across Data Planets without moving data — discover insights through smart, secure dialogue.

POST ANALYSIS

Extend with plugins and visuals to run custom, domain-specific analytics.

AI-READY API SUPPORT

Access data exploration and analysis features via APIs to power AI Apps.

SEARCH & RELATE IN THE DATA ECOSYSTEM

AI-powered semantic search links people, events, time, places, and objects across Data Planets — enabling seamless cross-domain analysis.

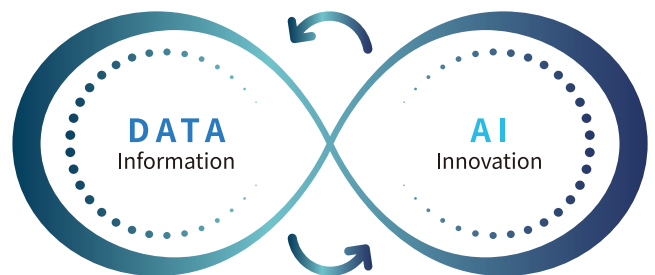

BigObject has been dedicated to data provisioning technology for the last decade, implementing its patented high performance In-Data Computing time-series database.

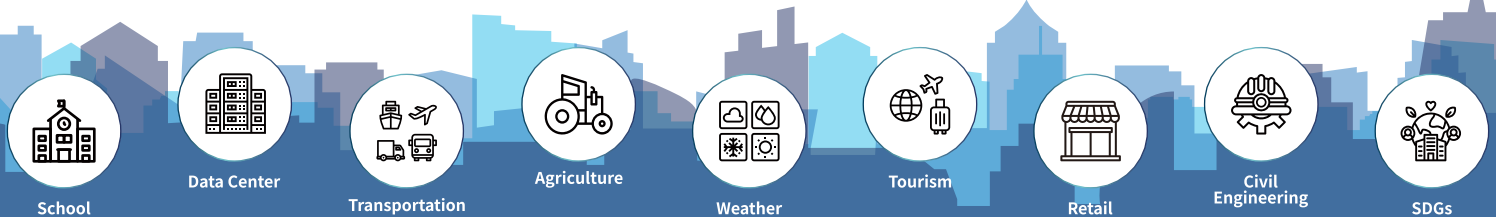

Its next-generation Data Ecosystem - Aralia, offers a decentralized data provision infrastructure, aiming to embark on a provider-driven data sharing paradigm.

By bridging a dynamic open-ended data ecosystem to LLMs, via OpenRAG framework, Aralia enriches the data sources for the vibrant development of AI Agents.
